ID Card Solutions

Card Printers, it's what we do.

Oversized Card Printing

Oversized Event Cards and Badges are becoming essential items for the safe and secure operation of stadiums, major sporting events and VIP functions. Used to identify visitors, catering & service staff, security personnel, media representatives and VIP's, the larger card makes identifying the person's designation simple, even across a large room.

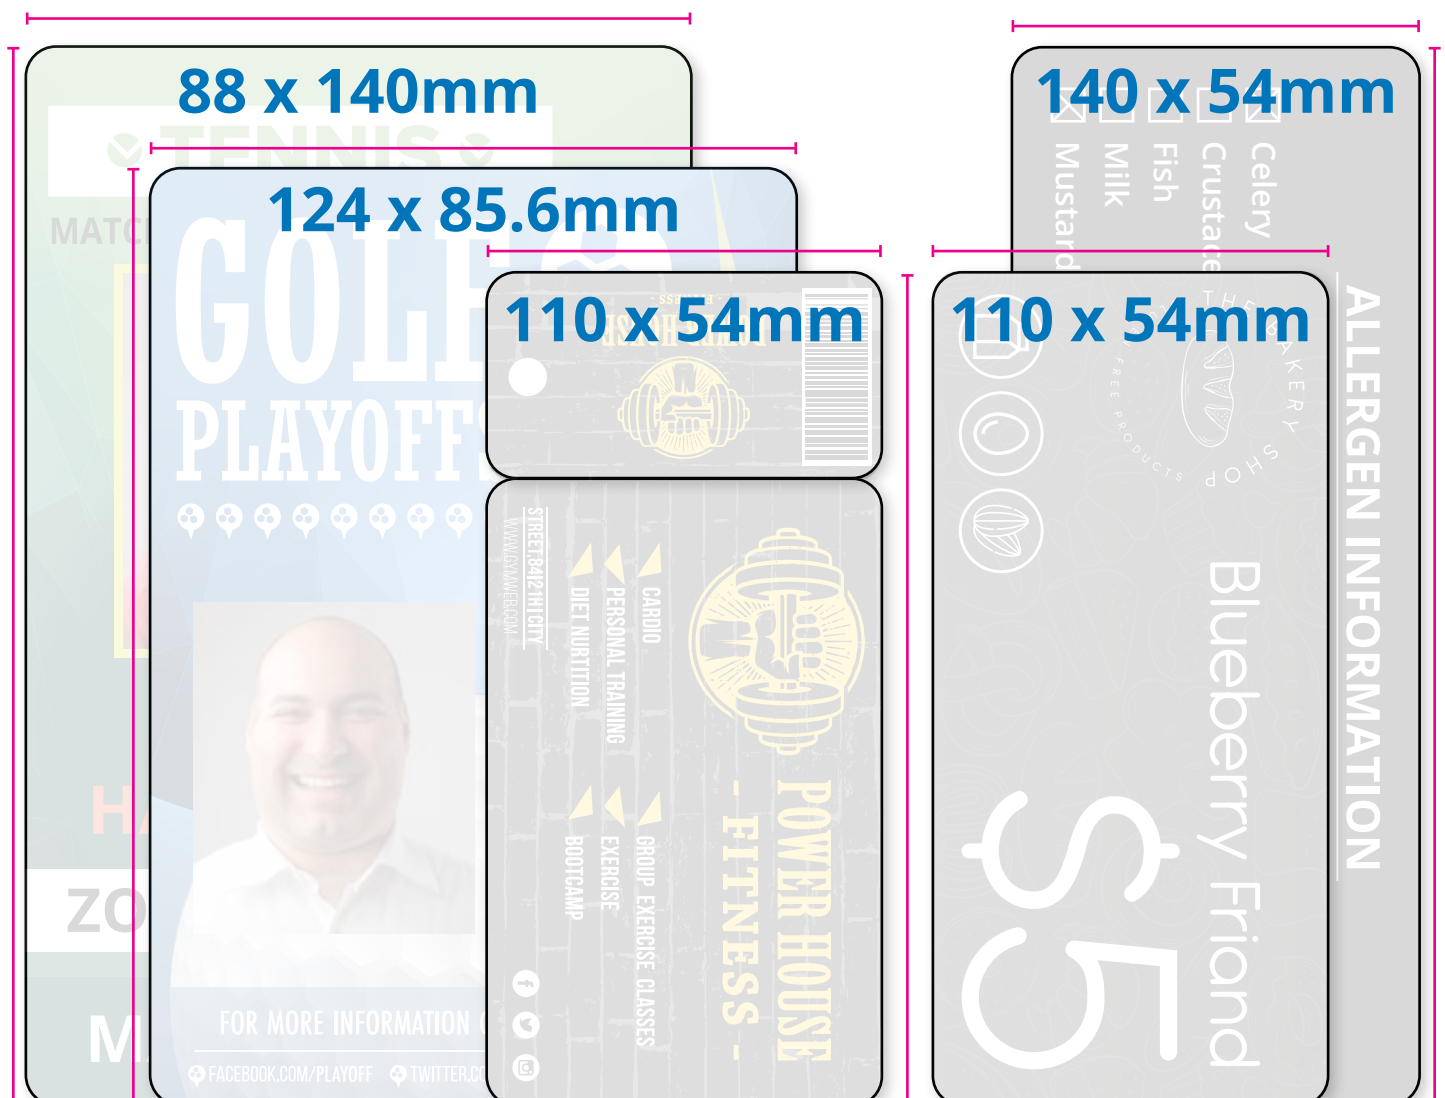

Many events are hosted in large areas like stadiums and conference halls. In locations like these, the ability to identify people and their security designation or VIP status is critical.

From a security point of view, being able to tell if someone is in the wrong place, or requires an escort can be critical to safety. Organisers will also want to know VIP's are quickly identified and provided the right treatment and not prevented from accessing the VIP facilities.

Event Badges also present a great way to promote your brand. Oversized Credentials usually feature the promoter/organisers brand prominently at the top of the card. This brand is the first thing seen during media conferences and official photographs. The value of this type of promotion and recognition can be significant.

Oversized Badges can be pre-printed, may come with smart card and proximity chips, covert security features like UV printing, and a range of hole punches for different lanyard configurations.

Traditionally organisations have outsourced the production of large-format ID cards. However, with an increasing number of options available, now is a great time to see how much you can save, while improving your service levels by issuing cards on the spot.

PPC ID3350e Xtended

Dual Purpose, Extended Cards

The PPC ID3350e Xtended can produce both standard CR-80 Cards and extended cards for events and labeling applications. Compared to other oversized solutions, the ID3350e Xtended only produces long, narrow cards, as it utilises the same card path for standard and long cards.

The ID3350e Xtended can produce 150 Full Colour cards per hour, and comes with an industry leading 3 year warranty.

PPC RTP XL8500

Superior print quality and reliability

The RTP XL8500 is a high quality oversized event badge printer. Based on the industries leading retransfer printer, the RTP XL8500 produces vivid photos with crisp clear text.

With an output of up to 85 cards per hour in full colour, this model can give you a piece of mind even in the times of pressing deadlines and mounting tasks. Its compact size makes for easy on-site event badge printing without compromising the office space.

Zebra ZC10L

Oversized Security Credentials

Zebra's ZC10L is the only large-format, direct-to-card printer that can produce full, edge-to-edge oversized colour cards in one printing process. Reduce waste and save money on pre-printed cards and unusable leftover cards by printing what you need on demand. No need to order partially pre-printed ID cards or badges in advance.

With the ZC10L you can make card design changes right up to the time of the event. Including sponsor logos, advertising and taking guest photos at the point of entry to further personalise cards.

Swiftcolor SCC4000D

Inkjet Based Printing

The SwiftColor SCC4000D Oversized Credential printer features single pass print-head technology and prints in beautiful 1200dpi.

The SCC4000D is highlighted by its blazing fast print speed, printing a full-colour card in 2 seconds! It is a perfect fit printing oversize badges for tradeshow, concerts, music festivals, racing, golf, major sports and stadium special events, parking passes, door hangers, tradeshow, media credentials, educational summits and seminars, and more.

"We are here to make sure
our solution lives up to
your expectations..."

With PPC, an ID solution is more than just a printer.

Features include:

MAG STRIPE

SMARTCARDS

EDGE TO EDGE

DUAL SIDES

SECURE CARD

Brochures can't tell the whole story and maximising ID benefits is not just about choosing a printer. Your PPC consultant will explore your objectives and ensure both equipment and security options perfectly match your needs. We are here to ensure our solution lives up to all of your expectations.

PPC's technical experts can help integrate your current smart, RFID and proximity technology or allow for future needs. Our range of certified RFID-ready printers are compatible with most systems and support full data enrichment. PPC printers work with most smart card technologies including MIFARE®, MIFARE Classic®, MIFARE DESFire®, MIFARE Plus®, 125kHz Prox, UHF, Gen2 and other formats available on request.

MIFARE Plus
MIFARE DESFire EV1/EV2
MIFARE Classic

Greater security without great costs

Securing your ID cards need not be expensive. PPC's options meet a wide range of security standards and budgets. Depending on the model, secure cards may cost no more than ordinary cards. The choice of security features includes options such as:

- Over-laminate
- UV print
- Hologram
- HoloKote
- Hot foil stamp
- Secure pre-printed features
